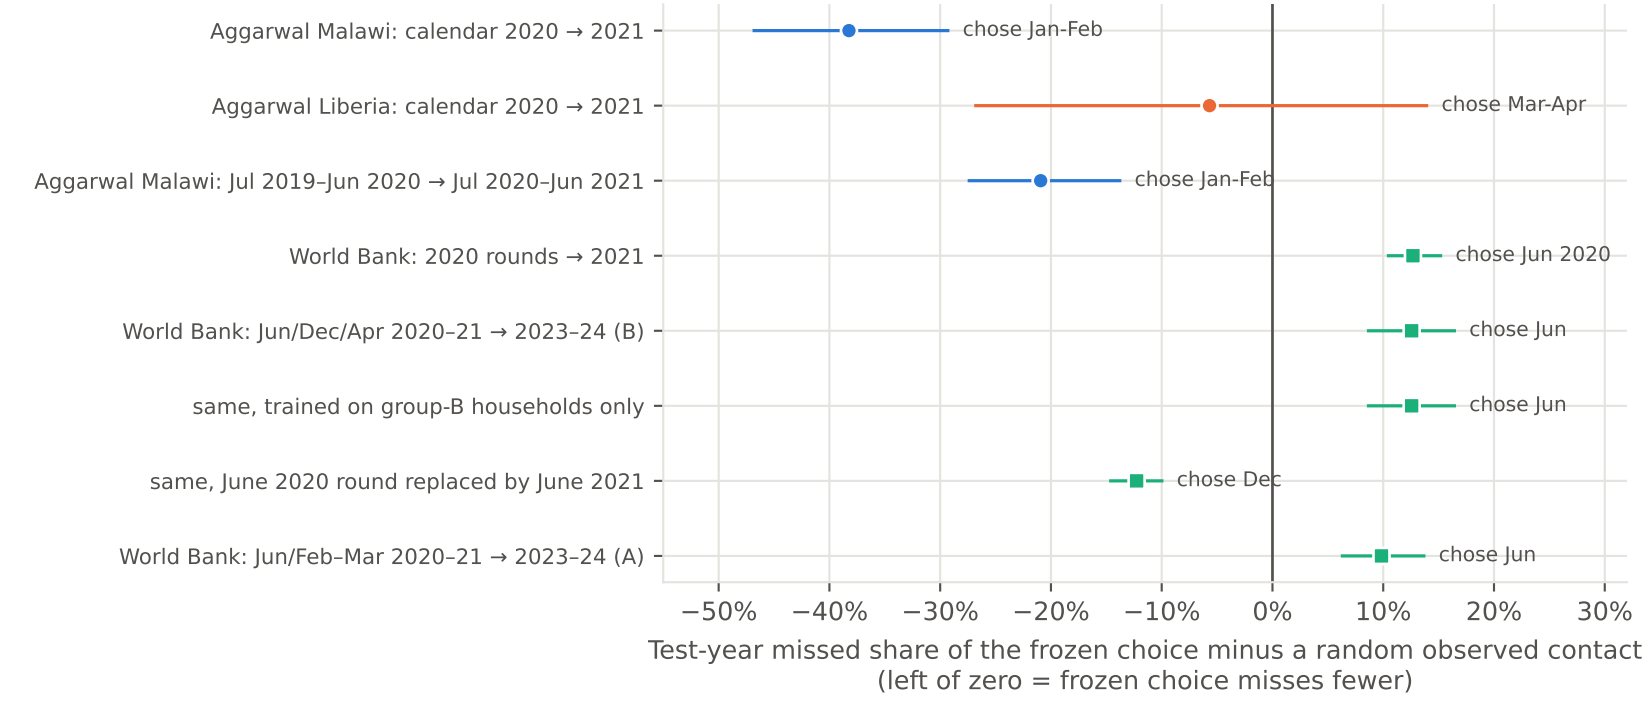
Choosing the contact month from one earlier year worked when that year was typical, and failed when the training data began at the pandemic onset



Each row selects one contact window on training data only, freezes it, and scores it on later data. World Bank rows: 'hungry but did not eat' item; their 2023–24 ranking was predictable from round-level rates seen during the audit, so these are not blind tests. The 2020 World Bank training data start at the pandemic onset (late May 2020).
